Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at factor cost as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in *System of National Accounts, 1993*, a joint publication of the Commission of the European Communities, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations and World Bank.

Le système de comptabilité nationale

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs propres. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) portent le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont le numéro de catalogue commence par 15 comprennent aussi les mesures de l'apport de chaque branche d'activité au total du produit intérieur brut au coût des facteurs ainsi que les mesures de productivité.

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut par activité économique. Les comptes de flux financiers (publications dont le numéro de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et l'entité juridique est le point de départ du classement des agents économiques. Les comptes du bilan des actifs et passifs en cours sont disponibles annuellement.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication *System of National Accounts, 1993* produite conjointement par la Commission des Communautés Européennes, le Fonds Monétaire International, l'Organisation pour la Coopération et le Développement, les Nations-Unies et la Banque Mondiale.

Notice to Users

This publication presents information about Canada's National Income and Expenditure Accounts (IEA). These accounts portray the evolution of the Canadian economy on a quarterly basis. They record the components of income and expenditure, saving and investment, and borrowing and lending of each of four broad sectors of the economy: (i) persons and unincorporated businesses, (ii) corporate and government business enterprises, (iii) government and (iv) non-residents. The sum of the final (non-transfer) income or the final (non-intermediate) expenditure of all domestic sectors equals gross domestic product at market prices, the market value of total production in Canada.

The sectoral structure of these accounts can best be explained through an example. Consider the corporate and government business enterprises sector. Corporations receive income in the form of profits, other investment income and capital assistance from government. They pay out part of that income as interest and dividends, direct taxes or other transfers such as charitable donations, and save the remainder. Corporations also invest in plant, equipment and inventories. To the extent their investment exceeds or falls short of their saving, they either borrow from or lend to other sectors in the form of financial transactions. The net borrowing or lending of a sector is also the difference between financial asset acquisition (bank deposits, purchase of bonds, purchase of equity and so on) and liability acquisition (bank borrowing, bond sales, equity financing and so on). The system as a whole, then, provides two equivalent measures of net lending by sector, which differ somewhat due to statistical errors. The sum of net lending by all sectors must be zero.

Financial transactions are expanded in the Financial Flow Accounts (FFA). The FFA show the details of the financing of economic activity, as well as the economy-wide intermediation of funds, in considerable detail (covering 30 institutional sectors).

Documentation

The concepts, sources and methods of the IEA and FFA are described in the following publications:

Guide to the Income and Expenditure Accounts, Catalogue No. 13-603-XPE, No.1.

Additional explanations can be found in the technical papers included from time to time in the national accounts publications. A list of previously published papers follows.

Avis aux utilisateurs

La présente publication nous renseigne sur les Comptes nationaux des revenus et dépenses (CRD) au Canada. Ceux-ci permettent de constater l'évolution de l'économie au Canada sur une base trimestrielle. Ils font état des composantes des revenus et des dépenses, de l'épargne, de l'investissement, de l'emprunt et du prêt de chacun des quatre grands secteurs de l'économie: i) les particuliers et les entreprises individuelles; ii) les sociétés et entreprises publiques; iii) les administrations publiques; et iv) les non-résidents. La somme du revenu final (excluant les paiements de transfert) ou des dépenses finales (excluant les coûts intermédiaires) de chaque secteur domestique correspond au produit intérieur brut aux prix du marché, c'est-à-dire la valeur marchande de la production totale au Canada.

La structure sectorielle de ces comptes mérite d'être expliquée. Prenons par exemple le secteur des sociétés et entreprises publiques. Les sociétés touchent des revenus sous forme de bénéfices, d'autres revenus de placements et des subventions d'équipement des administrations publiques. Elles versent une partie de ces revenus en intérêts et en dividendes, en impôts directs et sous forme d'autres transferts, par exemple des dons de charité, et épargnent le reste. Les sociétés investissent en outre dans des installations, du matériel et des stocks. Selon que leur investissement est supérieur ou inférieur à leur épargne, elles empruntent de l'argent d'autres secteurs ou en prêtent à ces derniers sous forme de transactions financières. L'emprunt ou le prêt net d'un secteur peut être aussi la différence entre l'acquisition d'actifs (dépôts bancaires, achat d'obligations, achat d'actions, etc.) et d'instruments de passif (emprunts bancaires, vente d'obligations, financement par actions, etc.). Le système dans son ensemble fournit par la suite deux mesures équivalentes du prêt net par secteur qui diffèrent quelque peu en raison des erreurs statistiques. La somme du prêt net de tous les secteurs doit être égale à zéro.

Les transactions financières, sous une forme non désaisonnalisée, figurent aussi dans les Comptes des flux financiers (CFF). Les CFF nous renseignent sur le financement de l'activité économique ainsi que sur l'intermédiation de fonds, et ce à un niveau très détaillé (30 secteurs institutionnels).

Fourth quarter 2002

Growth in the economy slowed in the fourth quarter to 0.4% from 0.9% in the third quarter. The decline in exports was the largest contributor to this slowdown. However, growth in final domestic demand accelerated to 0.9 % as increases in consumer spending were widespread and the housing boom continued. For the year, the rate of growth increased to 3.4%, similar to growth over much of the last decade which has averaged 3.5% each year.

Faits saillants

Quatrième trimestre de 2002

La croissance économique a connu un ralentissement, passant de 0,9 % au troisième trimestre à 0,4 % au quatrième. La baisse des exportations a le plus contribué à ce repli. Toutefois, la croissance de la demande intérieure finale s'est accélérée, atteignant 0,9 %, en raison des augmentations généralisées des dépenses de consommation et de l'essor qui s'est maintenu dans le secteur de l'habitation. Le taux de croissance pour l'année a augmenté pour s'établir à 3,4 %, ce qui s'apparente au taux enregistré au cours de la majeure partie de la dernière décennie, soit en moyenne 3,5 % par année.

A drop in exports during the quarter was only partly offset by sustained strength in consumer spending, especially on durable goods such as furniture and automobiles. Investment in residential construction, though slower in the quarter, advanced a healthy 2.6%. Household borrowing also picked up in line with these developments. Business investment in plant and equipment declined in the quarter, despite the continued growth in profits.

Une baisse des exportations au cours du trimestre n'a été que partiellement contrebalancée par la vigueur soutenue des dépenses des consommateurs, particulièrement au chapitre des biens durables, comme les meubles et les véhicules automobiles. L'investissement en construction résidentielle, même s'il a été plus faible au cours du trimestre, a fortement progressé de 2,6 %. Parallèlement, les ménages ont recommencé à emprunter. L'investissement des entreprises en usines et en matériel a diminué au cours du trimestre, en dépit de la croissance soutenue des bénéfices.

Exports fell as U.S. economy slowed

Exports fell 2.1% in the fourth quarter following three quarters of growth.

fourth quarter of 1996. Exports of passenger vehicles slid 17.4% as U.S. consumers curbed their appetites for new vehicles. Wheat exports dropped 26.7% as a result of the drought reduced stocks.

Exports of forestry products grew 2.1%, one of the largest offsets to otherwise declining exports. Like Canada's, the U.S. housing market continued to be strong. Softwood lumber exporters, facing U.S. tariffs, slashed prices and increased export volumes to their highest level since 1996. In addition, oil exports have grown 5.6% with a slowdown in Venezuelan oil production and low U.S. inventories.

Widespread growth in personal expenditures

All major categories of expenditures for consumer goods and services grew with combined growth of 1.1%.

Consumers returned to the showrooms as expenditures on motor vehicle increased 1.6% following a 2.0% decline in the third quarter. New car sales fell 1.2% while new truck sales were much stronger, growing 7.0%. Unit sales of motor vehicle reached a record in October, fell during November and recovered to a new record in December. Manufacturers maintained financing incentive programs. Continuing strength in the housing market lead to a jump in furniture and floor coverings of 5.4% while household appliance sales advanced 1.7%. Increased aircraft passenger traffic lead to 4.8% growth in purchased transportation services. Colder than normal weather during the quarter resulted in a significant increase on expenditures for energy.

The Labour Force Survey recorded an increase of 128,000 jobs during the quarter. The increase in employment in Ontario and Quebec accounted for almost two thirds of the increase. Labour income grew 1.7%, stronger than the two previous quarters.

connu leur recul le plus important depuis le quatrième trimestre de 1996. Les exportations de voitures particulières ont diminué de 17,4 %, les consommateurs américains ayant freiné leur ardeur à l'égard des véhicules neufs. Les exportations de blé ont chuté de 26,7 %, par suite des stocks réduits dû à la sécheresse.

Les exportations de produits forestiers ont augmenté de 2,1 %, une de celles qui ont le plus contribué à contrebalancer la baisse des exportations. Tout comme au Canada, le marché de l'habitation aux États-Unis est demeuré vigoureux. Les exportateurs de bois-d'oeuvre, confrontés aux tarifs imposés par les États-Unis, ont réduit considérablement leurs prix et ont augmenté leurs volumes d'exportation, lesquels ont atteint leur plus haut niveau depuis 1996. De plus, les exportations de pétrole ont connu une hausse de 5,6 %, en raison de la production moins élevée de pétrole au Venezuela et de la faiblesse des stocks américains.

Hausse généralisée des dépenses personnelles

Toutes les principales catégories de dépenses en biens et services de consommation ont augmenté, la hausse combinée atteignant 1,1 %.

Les consommateurs ont repris le chemin des salles de montre, leurs dépenses au titre des véhicules automobiles ayant augmenté de 1,6 %, après une baisse de 2,0 % au troisième trimestre. Les ventes d'automobiles neuves ont diminué de 1,2 %, tandis que celles de camions neufs ont été beaucoup plus vigoureuses, progressant de 7,0 %. Les ventes de véhicules automobiles (en unités) ont atteint un niveau record en octobre, ont reculé en novembre et ont atteint un nouveau sommet en décembre. Les fabricants ont maintenu leurs programmes d'incitatifs de financement. La vigueur soutenue du marché de l'habitation a entraîné une hausse marquée de 5,4 % des dépenses en meubles et recouvrements de sol, tandis que celles d'appareils ménagers ont progressé de 1,7 %. L'augmentation de l'achalandage dans le domaine du transport aérien a entraîné une hausse de 4,8 % des achats de services de transport. Des températures plus froides que la normale au cours du trimestre ont donné lieu à une hausse significative des dépenses au titre de l'énergie.

Dans le cadre de l'Enquête sur la population active, on a noté une augmentation de 128 000 emplois au cours du trimestre. La hausse de l'emploi en Ontario et au Québec représente presque les deux tiers de cette augmentation. Le revenu du travail a progressé de 1,7 %, soit une hausse plus importante que celle enregistrée à chacun des deux trimestres précédents.

Continued housing boom

Investment in residential structures continued at historically high levels. Growth cooled slightly from 3.8% in the third quarter, to 2.6% in the fourth.

The value of new housing construction grew 2.9% following a jump of 6.9% in the third quarter. Quarterly housing starts reached their highest level since 1990. Expenditures on renovations increased 2.2% similar to the previous quarter. Ownership transfer costs, which include real estate commissions, rebounded to a 2.2% increase, following two quarters of decline.

Motor vehicle inventories grew

Businesses accumulated inventories of almost \$10 billion in the fourth quarter. Increases in stocks were widespread in manufacturing and trade industries.

Retail motor vehicle inventories accounted for more than 40% of this buildup. Contributing to this buildup was a 9.1% increase in motor vehicle imports. Partially offsetting some of these widespread increases was a reduction in grain inventories, impacted by the drought in Western Canada.

Business investment in plant and equipment slipped

Investment in plant and equipment slipped 0.4% in the fourth quarter.

Investment in non-residential structures slid 0.8%, the sixth consecutive decline. Investment in buildings and engineering both declined.

Investment in machinery and equipment was almost flat (-0.1%). Investment in industrial machinery jumped 5.5%. However, this increase was offset by falling investment in telecommunications equipment and lower spending on automobiles by businesses. Telecommunications equipment investment marked its sixth consecutive decline, with just three quarters of growth in the past three years.

L'essor se maintient dans le secteur de l'habitation

L'investissement en bâtiments résidentiels s'est poursuivi et a atteint des niveaux historiquement élevés. La croissance a connu un léger ralentissement, passant de 3,8 % au troisième trimestre, à 2,6 % au quatrième.

La valeur de la construction de logements neufs a augmenté de 2,9 %, après un bond de 6,9 % au troisième trimestre. Le nombre de mises en chantier pour le trimestre a atteint son niveau le plus élevé depuis 1990. Les dépenses en rénovations ont augmenté de 2,2 %, soit une croissance similaire à celle enregistrée au trimestre précédent. Les coûts de transfert de propriété, qui comprennent les commissions sur les ventes de maisons, ont rebondi, en hausse de 2,2 % après deux trimestres de baisses.

Les stocks de véhicules automobiles augmentent

Les entreprises ont constitué des stocks représentant presque 10 milliards de dollars au quatrième trimestre. Ces hausses des stocks ont été généralisées dans les secteurs de la fabrication et du commerce.

Plus de 40 % de l'accumulation est attribuable aux stocks de véhicules automobiles vendus au détail, suite à une augmentation de 9,1 % des importations de véhicules automobiles. Une baisse des stocks de céréales, découlant de la sécheresse qui a sévi dans l'Ouest canadien, a contrebalancé en partie ces hausses généralisées.

L'investissement des entreprises en usines et en matériel recule

L'investissement en usines et en matériel a reculé de 0,4 % au quatrième trimestre.

L'investissement en bâtiments non résidentiels a connu une baisse de 0,8 %, la sixième diminution consécutive. Les investissements en bâtiments et en ouvrages de génie ont tous deux reculé.

L'investissement en machines et matériel a peu varié (-0,1 %). L'investissement en machinerie industrielle a fait un bond de 5,5 %. Toutefois, cette hausse a été contrebalancée par une baisse de l'investissement en matériel de télécommunications et des achats d'automobiles par les entreprises. L'investissement en matériel de télécommunications a connu sa sixième baisse consécutive, lequel n'a enregistré seulement que trois trimestres de croissance au cours des trois dernières années.

Profit growth stable

Profits have grown over the past four quarters and they have returned to near the record level established in the first quarter of 2001. However, profit growth has been slower in the last two quarters, averaging 2.7% growth, than in the first two quarters of the year, when growth averaged 11.6%. Non-financial enterprises enjoyed stronger growth in the fourth quarter than their financial counterparts. The oil and gas extraction industry posted higher profits this quarter than during the third whereas manufacturers lost ground in terms of profit growth this quarter.

Continued modest increase in government spending

Net government expenditure on goods and services increased 0.9%, following a 0.7% gain in the previous quarter. Increased health and education spending at the provincial and local government level contributed to this change. Government expenditure on a national accounts basis has increased modestly each quarter over the past 4 years.

The surplus (annualized national accounts basis expressed in nominal dollars) for all levels of government rose to \$22.0 billion in the fourth quarter, up strongly from the third quarter and the fourth consecutive increase. Much of this surplus originates in the federal government where the accumulation of federal government surpluses stemmed from increased personal income tax and taxes on products (Goods and Services Tax and Excise Taxes) combined with almost no growth in overall spending.

Energy costs increased prices

Prices, as measured by the implicit chain price index for GDP, increased 1.2% following a smaller increase in the third quarter. Prices have increased for four consecutive quarters following two quarters of deflation. The threat of war impacted crude oil prices during the quarter. Crude oil prices touched \$32U.S.

La croissance des bénéfices demeure stable

Les bénéfices ont progressé au cours des quatre derniers trimestres et sont revenus près du niveau record qu'ils avaient atteint au premier trimestre de 2001. Toutefois, la hausse des bénéfices a été plus lente au cours des deux derniers trimestres, se situant en moyenne à 2,7 %, comparativement à une moyenne de 11,6 % au cours des deux premiers trimestres de l'année. Au quatrième trimestre, les entreprises non financières ont connu une croissance plus vigoureuse que celles du secteur financier. Le secteur de l'extraction du pétrole et du gaz a affiché de meilleurs résultats qu'au cours du troisième trimestre, tandis que la croissance des bénéfices des fabricants perdait du terrain.

Les dépenses des administrations publiques augmentent de façon modeste mais soutenue

Les dépenses nettes des administrations publiques en biens et en services ont augmenté de 0,9 %, après un gain de 0,7 % au cours du trimestre précédent. Les dépenses accrues dans les secteurs de la santé et de l'éducation des administrations provinciales et locales ont contribué à ce changement. Les dépenses des administrations publiques, sur la base de la comptabilité nationale, ont augmenté de façon modeste chaque trimestre au cours des quatre dernières années.

L'excédent combiné (sur la base de la comptabilité nationale, annualisé et aux prix courants) pour tous les niveaux de l'administration publique s'est établi à 22 milliards de dollars au quatrième trimestre. Il s'agit d'une hausse considérable par rapport au troisième trimestre et de la quatrième augmentation consécutive. Une part importante de cet excédent provenait de l'administration fédérale, l'excédent accumulé de cette dernière découlant d'une hausse des impôts sur le revenu des particuliers et des taxes sur les produits (Taxe sur les produits et services et taxe d'accise), combinée à une croissance à peu près nulle des dépenses globales.

Les prix augmentent en raison des coûts de l'énergie plus élevés

Les prix, tels que mesurés par l'indice implicite de prix en chaîne du PIB, ont augmenté de 1,2 % au quatrième trimestre, suite à une hausse plus faible au trimestre précédent. Les prix ont progressé pendant quatre trimestres consécutifs, après deux trimestres de déflation. La menace d'une guerre a eu des répercussions sur les prix du pétrole brut au cours du

compared to \$21U.S. at the beginning of the year. Prices excluding energy costs, rose 0.7% during the quarter.

2002 year-end review

Growth in GDP accelerated to 3.4% in 2002 from 1.5% in the previous year. However, growth had averaged almost 4.6% from 1997 to 2000. During 2002, the housing market boomed and consumers increased their spending, particularly for automobiles. Businesses reduced their expenditures for plant and equipment by 3.9% while exports edged ahead. Prices, as measured by the implicit chain price index for GDP, advanced 1.2%.

Lower interest rates and increased spending on durables and housing

Interest rates declined throughout 2001 and 2002 began with historically low rates which increased modestly during the year. Consumers borrowed more and more to finance expenditures throughout the year and the accumulation of debt by the personal sector reached unprecedented levels. While debt to income ratios reached record levels, the interest burden of the debt was reduced.

Personal expenditures on durable goods increased by 6.4%. Consumer spending on motor vehicles advanced 7.1% following slower growth in the previous two years. Manufacturers offered financing incentives for vehicle purchases throughout the year. Unit sales of motor vehicles advanced in all provinces, with Manitoba recording the largest increase (+13.9%).

The value of residential building permits issued surged 32.1% over 2001. Investment in residential construction increased in each of the past four years. Growth in housing investment accelerated in 2002 (+15.9%) to a rate last seen in 1987 during the previous housing boom. Conventional one year mortgage rates stood at 4.6% in January 2002 compared to 7.4% one year earlier. Average mortgage rates were at their lowest in decades. The resale housing market remained strong as ownership

trimestre. Ceux-ci ont atteint 32 \$ US, comparativement à 21 \$ US au début de l'année. Les prix, à l'exclusion des coûts de l'énergie, ont augmenté de 0,7 % au cours du trimestre.

Résultats de l'année 2002

La croissance du PIB s'est accélérée en 2002, atteignant 3,4 %, comparativement à 1,5 % l'année précédente. La croissance s'était cependant située en moyenne à presque 4,6 % de 1997 à 2000. En 2002, le marché de l'habitation a connu un essor et les consommateurs ont augmenté leurs dépenses, particulièrement au chapitre des véhicules automobiles. Les entreprises ont diminué leurs dépenses en usines et en matériel de 3,9 %, tandis que les exportations ont augmenté légèrement. Les prix, tels que mesurés par l'indice implicite de prix en chaîne du PIB, ont progressé de 1,2 %.

Taux d'intérêt plus faibles et dépenses accrues au titre des biens durables et du logement

Les taux d'intérêt ont baissé tout au long de 2001 et l'année 2002 a commencé avec des taux historiquement faibles. Ils n'ont augmenté que de façon modeste au cours de 2002. Tout au long de l'année, les consommateurs ont emprunté de plus en plus pour financer leurs dépenses et la dette du secteur des particuliers a atteint des niveaux sans précédent. Même si le ratio d'endettement a connu des niveaux record, le fardeau des dépenses en intérêts a diminué.

Les dépenses personnelles en biens durables ont augmenté de 6,4 %. Les dépenses de consommation au chapitre des véhicules automobiles ont progressé de 7,1 %, après avoir connu une croissance plus faible au cours des deux années précédentes. Les fabricants ont offert des incitatifs de financement pour les achats de véhicules tout au long de l'année. Les ventes de véhicules automobiles (en unités) ont progressé dans toutes les provinces, le Manitoba ayant connu la hausse la plus marquée (+13,9 %).

La valeur des permis de construction résidentielle délivrés a fait un bond de 32,1 % par rapport à 2001. L'investissement en construction résidentielle a augmenté pour chacune des quatre dernières années. La croissance de l'investissement dans l'immobilier s'est accélérée en 2002, atteignant 15,9 %, un taux similaire à celui de 1987, lors de la précédente période d'essor qu'a connue ce secteur. Les taux hypothécaires conventionnels pour un an se situaient à 4,6 % en janvier 2002, comparativement à 7,4 % un an plus tôt. Les taux hypothécaires moyens ont atteint leur

transfer costs, which include real estate commissions, leapt 11.3%.

The surging housing market stimulated purchases of furniture and appliances. Furniture and floor coverings sales jumped 7.7% while household appliance purchases increased 7.0%. Personal spending on semi and non durable goods as well as services increased during the year. Purchases of communication services continued to grow at a fast pace in 2002. Offsetting some of this growth, travel expenditures continued to fall. In addition, sales of tobacco products dropped 7.0% with the introduction of higher tobacco taxes by the federal and provincial governments.

Labour income increased 4.6%, up slightly from 2001. Growth in labour income averaged 4.4% annually in the last decade. Over the year, employment rose 2.2%. Employment grew in all provinces, except Newfoundland and Labrador, during 2002.

Business plant and equipment spending slumps

Business investment in both plant and equipment fell 3.9% in 2002 following a more modest slowdown in spending in 2001. Investment in non-residential structures fell 6.4%, following increased spending in the previous nine years. Building investment dropped 11.1%. Machinery and equipment spending slipped 2.4% following a similar decrease in 2001. Both telecommunications (-21.8%) and other transportation equipment (-17.4%) investment suffered notable drops. Partially offsetting these declines, businesses increased spending on trucks, automobiles, software, and computers and other office equipment.

Businesses accumulated inventories in 2002 following inventory reductions during 2001. Non farm inventories grew, particularly motor vehicles stocks were built up during the year. Offsetting this growth, farm inventories diminished. The second year of drought in Western Canada further reduced

plus bas niveau depuis des décennies. Comme le marché de la revente de maisons est demeuré vigoureux, les coûts de transfert de propriété, qui comprennent les commissions sur les ventes de maisons, ont fait un bond de 11,3 %.

L'essor du marché de l'habitation a stimulé les achats de meubles et d'appareils ménagers. Les ventes de meubles et de revêtements de sol ont fait un bond de 7,7 %, tandis que les achats d'appareils ménagers ont augmenté de 7,0 %. Les dépenses personnelles en biens semi-durables et non durables, ainsi qu'en services, ont augmenté au cours de l'année. Les achats de services de communications ont continué de progresser à un rythme rapide en 2002. Les dépenses au titre des voyages ont continué de diminuer, ce qui a contrebalancé en partie cette croissance. Par ailleurs, les ventes de produits du tabac ont chuté de 7,0 %, par suite de l'imposition de taxes plus élevées sur le tabac par les administrations fédérale et provinciales.

Le revenu du travail a augmenté de 4,6 %, une hausse légère par rapport à 2001. La croissance annuelle du revenu du travail s'est située en moyenne à 4,4 % au cours de la dernière décennie. Au cours de l'année, l'emploi a augmenté de 2,2 %. En 2002, l'emploi a progressé dans toutes les provinces, sauf à Terre-Neuve-et-Labrador.

Les dépenses des entreprises en usines et matériel diminuent

L'investissement des entreprises en usines et matériel a diminué de 3,9 % en 2002, ce qui fait suite à une baisse plus modeste des dépenses en 2001. L'investissement en ouvrages non résidentiels a diminué de 6,4 %, après neuf années d'augmentation. L'investissement en bâtiments non résidentiels a chuté de 11,1 %. Les dépenses au chapitre des machines et du matériel ont reculé de 2,4 %, suivant une baisse similaire en 2001. L'investissement en matériel de télécommunications (-21,8 %) et en autre matériel de transport (-17,4 %) a connu des baisses importantes. Les dépenses accrues des entreprises au titre des camions, des automobiles, du logiciel, des ordinateurs et autre matériel de bureau ont contrebalancé en partie ces diminutions.

Les entreprises ont constitué des stocks en 2002, après les avoir réduits en 2001. Au cours de l'année, les stocks non agricoles ont augmenté, plus particulièrement les stocks de véhicules automobiles. Les stocks agricoles ont diminué, ce qui a contrebalancé cette hausse. La deuxième année de

grain inventories. Output of Western Canada's six major crops was down 25% from 2001.

Corporations generated increased profits (+6.2%) following a decline in 2001. A high level of undistributed earnings coupled with weaker capital spending, pushed the corporate surplus to a record level in 2002. The corporate sector has been in an atypical net lending position for the past three years. In addition, corporations' demand for borrowed funds was down again over the year, further improving the debt-to-equity ratio.

The volume of exports edged ahead 0.8% following a decrease in 2001. Exports growth averaged 7.6% in the preceding ten years. Exports of industrial goods and materials, energy and automotive products were the largest contributors to growth in 2002. Exports of wheat plummeted 27.5% with the impact of the drought. Machinery and equipment exports fell with continued weakness in the exports of telecommunications equipment (-18.8%) and computers and office machinery (-10.4%).

All levels of government edged spending up

Net government expenditure on goods and services increased 2.0%, following a 3.3% gain in 2001. All levels of government contributed to this increase. Government expenditure on a national accounts basis has increased each year for five years.

The surplus (national accounts basis expressed in nominal dollars) for all levels of government fell to \$15.0 billion for 2002 from \$19.4 billion in 2001. The federal government surplus increased while provincial and local governments fell into deficit. Contributing significantly to the federal government surplus were falling interest expenditures and higher taxes on products being partially offset by a drop in personal taxes due to tax cuts and reduced capital gains. At the provincial level, the swing to a deficit resulted from reduced royalty payments, declining personal income taxes, lower intergovernmental transfers and higher spending on goods and

sécheresse dans l'Ouest canadien a contribué à réduire encore davantage les stocks de céréales. La production des six principales céréales dans l'Ouest canadien a été en baisse de 25 % par rapport à 2001.

Les sociétés ont vu leurs bénéfices augmenter (+6,2%), suivant une baisse en 2001. Le niveau élevé des bénéfices non répartis ainsi que les dépenses plus faibles en capital ont fait en sorte que les excédents des entreprises ont atteint un niveau record en 2002. Le secteur des entreprises s'est retrouvé dans une position atypique de prêt net au cours des trois dernières années. De plus, la demande de financement des sociétés a été en baisse encore une fois pour l'année, ce qui a contribué à améliorer le ratio d'endettement.

Le volume des exportations a faiblement progressé de 0,8 %, suivant une baisse en 2001. La croissance des exportations s'est située en moyenne à 7,6 % au cours des dix années précédentes. Les exportations de produits et de matériaux industriels, d'énergie, et de produits de l'automobile ont contribué le plus à la croissance en 2002. Les exportations de blé ont chuté de 27,5 % par suite de la sécheresse. Les exportations de machines et de matériel se sont repliées, compte tenu de la faiblesse continue des exportations de matériel de télécommunications (-18,8 %) ainsi que d'ordinateurs et de machines de bureau (-10,4%).

Les dépenses de tous les niveaux de l'administration publique augmentent légèrement

Les dépenses nettes des administrations publiques en biens et en services ont augmenté de 2,0 %, suivant un gain de 3,3 % en 2001. Tous les niveaux de l'administration publique ont contribué à cette hausse. Les dépenses des administrations publiques sur la base de la comptabilité nationale ont augmenté à chacune des cinq dernières années.

L'excédent (sur la base de la comptabilité nationale, aux prix courants) pour tous les niveaux de l'administration publique est passé de 19,4 milliards de dollars en 2001 à 15,0 milliards de dollars en 2002. L'administration fédérale a enregistré un excédent plus élevé, tandis que les administrations provinciales et locales ont généré des déficits. La diminution des dépenses d'intérêt et les taxes plus élevées sur les produits ont contribué de façon significative à l'excédent de l'administration fédérale, mais ont été contrebalancées en partie par une baisse de l'impôt sur le revenu des particuliers, découlant des réductions d'impôt et des plus faibles gains en capitaux. Au niveau

services. Mitigating this turn to a deficit were higher taxes on products, lower energy subsidies and lower interest payments.

provincial, le retournement vers un déficit a été le résultat d'une baisse des paiements de redevances, de l'impôt sur le revenu des particuliers et des transferts intergouvernementaux, ainsi que de dépenses plus élevées en biens et en services. Des taxes plus élevées sur les produits, des subventions plus faibles à l'énergie et des paiements d'intérêts plus bas sont venus atténuer ce retournement à un déficit.

Footnotes

Table 3

- [1] Chained dollar series are calculated as the product of the chain-type quantity index and the current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table 5

- [1] Sum of accrued net income of farm operators from farm production and net income of non-farm unincorporated business, including rent.
- [2] Total income minus current transfers to government.

Table 6

- [1] Includes interest and dividends received from non-residents.
- [2] Interest on the public debt is routed to other sectors of the economy through the corporate sector due to incomplete information on the transactions of government debt instruments.

Table 9, 10, 11, 12 and 13

- [1] [2] In GDP, government current expenditure is recorded on a net basis, that is, after deduction of sales of goods and services. In the government sector accounts, sales of goods and services to other sectors are shown separately as part of revenue, and current expenditure is recorded on a gross basis, which leaves saving unchanged.

Table 14

- [1] [2] [3] This account presents the saving as well as the net lending or borrowing position of non-residents with respect to their transactions with Canadian residents. The sign of these aggregates is, therefore, the reverse of what appears in the Canadian Balance of International Payments.

Table 15

- [1] [2] [3] [4] By definition, the sum of this aggregate over all sectors is equal to zero.

Notes

Tableau 3

- [1] Les séries en dollars enchaînées sont calculées en multipliant l'indice de quantité de type chaîne par les séries en dollars courants correspondantes, le tout divisé par 100. Étant donné que la formule de calcul des indexes de quantité de type chaîne utilisent des poids provenant de plus d'une période, les estimés de dollars en chaîne qui en sont dérivés ne sont généralement pas additifs.

Tableau 5

- [1] Somme du revenu comptable net des exploitants agricoles au titre de la production agricole et du revenu net des entreprises individuelles non agricoles, loyers compris.
- [2] Revenu total moins transferts courants aux administrations publiques.

Tableau 6

- [1] Comprends les intérêts et les dividendes reçus des non-résidents.
- [2] Les intérêts sur la dette publique sont affectés aux autres secteurs de l'économie par le biais du secteur des sociétés en raison d'un manque d'information sur les transactions de titres de dette des administrations.

Tableau 9, 10, 11, 12 et 13

- [1] [2] Dans le PIB, les dépenses courantes des administrations sont enregistrées sur une base nette, c'est-à-dire après déduction des ventes de biens et services. Dans les comptes sectoriels des administrations, les ventes de biens et services aux autres secteurs sont montrées séparément sous les revenus et les dépenses courantes sont enregistrées sur une base brute, ce qui laisse l'épargne inchangée.

Tableau 14

- [1] [2] [3] Ce compte présente la position des non-résidents en regard de leurs transactions avec les résidents canadiens, et ce pour l'épargne ainsi que, le prêt ou l'emprunt net. Conséquemment, le signe de ce agrégats est inversé par rapport à ce qui figure dans la balance des paiements internationaux du Canada.

Tableau 15

- [1] [2] [3] [4] Par définition, la somme de cet agrégat pour tous les secteurs est égal à zéro.

Glossary

Accrued net income of farm operators from farm production. Net income received by farm operators from farm production plus the undistributed portion of earnings arising out of the operations of the Canadian Wheat Board and the adjustment made to shift agricultural subsidies from a cash to an accrual basis.

Associations of individuals. Non-profit institutions serving households, such as churches, labour unions and charitable organizations, plus credit unions, trustee pension plans, life insurance companies, fraternal societies and mutual non-life insurance companies. They are treated as businesses with respect to their capital outlays and their intermediation activities, but as persons with respect to their current expenses.

Base period. Reference period from which prices are taken to calculate an index.

Basic prices. A basic price valuation includes the costs of **production factors** (labour and capital) and indirect taxes and subsidies on production factors. Income measures are estimated at basic prices or **market prices**.

Bonds. Marketable and non-marketable securities issued in Canadian or foreign currency with an original term to maturity in excess of one year. Includes:

Canada bonds. Direct bonds of the federal government (of which, Canada Savings Bonds) and guaranteed federal enterprise bonds.

Provincial bonds. Direct bonds of provincial governments (of which, provincial savings bonds) and guaranteed provincial enterprise bonds.

Municipal bonds. Direct bonds of municipalities and guaranteed municipal enterprise bonds.

Other bonds. Bonds issued by Canadian corporations, hospitals and non-profit institutions, as well as non-guaranteed bonds of government business enterprises. Also included are asset-backed securities.

Business gross fixed capital formation. This expression covers all expenditures on buildings, engineering construction and machinery and equipment by the **business sector**, both corporations and unincorporated businesses. Business gross fixed capital formation is divided into three major categories in production accounts: **residential structures**, **non-residential structures** and **machinery and equipment**.

Business investment in inventories. Business sector inventories consist of two categories: (a) **non-farm inventories** and (b) **farm inventories** and **grain in commercial channels**. These two categories are presented in detailed tables in the Economic and Financial Accounts. Business sector inventories are themselves subdivided into those of the persons and unincorporated businesses sector and those of the corporations and government business enterprises sector. These two estimates are shown in the respective sector accounts under the inventories heading.

Business sector. All transactors producing goods and services for sale at a price intended to cover costs of production, namely corporations, government business enterprises, unincorporated businesses and independent professional practitioners. Also includes owners occupying their own dwelling, treated as businesses renting to themselves, and associations of individuals, treated as businesses with respect to their capital outlays and their intermediation activities.

Canada and Quebec Pension Plans. The part of the government sector which consists of the operations of the Canada and Quebec Pension Plans, established in 1966.

Canadian residents. Institutional units, such as persons, corporations and non-profit institutions, which have a centre of economic interest (a dwelling, a business location) in the economic territory of Canada.

Capital and financial account. This account shows, for each major sector, a) the saving and acquisition of non-financial capital and the difference between them, called net lending; and b) transactions in financial assets, transactions in liabilities and the difference between them, called net financial investment. In theory, the two balancing items, net lending and net financial investment, are equal; in practice, imperfections in the statistics lead to a difference between the two, shown as a statistical discrepancy.

Capital consumption allowances. Allowances for the using up of capital in the productive process. They are calculated for business and government fixed assets as well as housing. They also include miscellaneous valuation adjustments bringing business accounting records into conformity with national accounts definitions, such as the addition of claims paid by insurance companies to compensate for fire and other losses.

Capital transfers. Transfers in cash or in kind, out of the wealth of the donor (**inheritances and migrants' funds**, transfer of ownership of an asset or cancellation of a

liability), or transfers which the recipient is expected to use towards the acquisition of an asset. Capital transfers have no effect on the saving of the donor or recipient.

Chain Fisher price index. See **implicit price indexes**.

Chain Fisher volume index. A measure of change in volume from period to period. It is calculated as the geometric mean of a **chain Paasche volume index** and a **chain Laspeyres volume index**. In other words, it is the mean of two distinct measures of change in volume: one calculated as if prices were constant in the first of two consecutive periods (Laspeyres volume) and the other calculated as if prices were constant in the second of the two consecutive periods (Paasche volume).

Chain index. An index which is rebased on a period to period basis, accumulated multiplicatively from a **base period** value. For example, the **chain Fisher volume index** calculates the Fisher volume index in each pair of consecutive quarters, treating the earlier quarter as the base period.

Chain Laspeyres volume indexes. A measure of the change in volume from period to period. It is calculated as if prices were constant in the first of two consecutive periods. The indexes of each of the periods are linked together in a chain to form an index. Chain Laspeyres volume indexes are one of the components of the **chain Fisher volume indexes** that are the official measure of the economic and financial accounts.

Chain Paasche volume indexes. A measure of the change in volume from period to period. It is calculated as if prices were constant in the second of two consecutive periods. The indexes of each of the periods are linked together in a chain to form an index. The chain Paasche volume indexes are one of the components of the **chain Fisher volume indexes** that are the official measure of the economic and financial accounts.

Changing the base period. Changing the base period of a series involves redefining the **base period** on which the weightings are established.

Claims. Financial instrument comprising:

Corporate claims. Loans, advances and issues of debt between associated corporations; on the asset side, also includes investment in shares between associated corporations.

Government claims. Claims between governments, between related government business enterprises or between a parent government and its enterprises, in the form of shares, debt securities, loans and advances.

Consumer credit. Credit extended to persons for purchasing consumer goods and services.

Consumer goods. New goods acquired by households for their own consumption. Comprises three categories:

Durable goods, which can be used repeatedly or continuously for more than one year, such as motor vehicles and major appliances;

Semi-durable goods, which can be used on multiple occasions and have an expected lifetime of one year or somewhat more, such as clothing, footwear and linens;

Non-durable goods, which can be used only once, such as food, gasoline, alcoholic beverages and tobacco; in practice, the latter also include a few goods of little value used more than once, such as household supplies.

Consumer services. Services consumed by households, such as rent (including the rent imputed on owner-occupied housing), transportation, education, medical care, child care, food and accommodation services as well as travel expenditures of Canadians abroad, less travel expenditures of foreigners in Canada. Also includes the current (operating) expenses of associations of individuals and unincorporated businesses.

Contributions to percent changes. These estimates show the contribution of a sub-aggregate to the percent change in an aggregate. For example, if personal consumer spending increases 2% and the contribution to the percent change by motor vehicle purchases is 1%, then motor vehicle purchases would be said to have accounted for half of the increase in personal consumer spending.

Contributions to social insurance plans. Employer and employee contributions to employment insurance, the Canada and Quebec Pension Plans and workers' compensation.

Corporate and government business enterprise sector. All business transactors whose legal form of organization is the corporation, plus government business enterprises. This sector is divided into non-financial and financial enterprises. The latter are comprised of several sub-sectors (Bank of Canada, chartered banks, credit unions, life insurance companies, trustee pension funds, mutual funds, etc.). The

intermediation activities of credit unions, life insurance companies and trustee pension funds shown as assets of these sub-sectors are balanced by claim liabilities which, in turn, are assets of the persons and unincorporated business sector.

Corporation profits before taxes. The net earnings from economic activity of privately-held corporations, measured after deduction of capital consumption allowances.

Currency and deposits. Financial instruments comprising:

Currency and bank deposits. Deposits denominated in Canadian dollars at chartered banks in Canada and at the Bank of Canada, plus Canadian currency and coin in circulation.

Other deposits. All deposits at other Canadian deposit-taking institutions, including shares in credit unions.

Foreign currency and deposits. Holdings of foreign currency and foreign currency denominated deposits at chartered banks in Canada, foreign branches and subsidiaries of Canadian chartered banks, foreign banks and other foreign deposit-taking institutions.

Current prices. A valuation at current prices is expressed at the prices prevailing during the period being referred to.

Current transactions with non-residents. Exports of goods and services less imports of goods and services, plus net investment income from non-residents and net current transfers from non-residents.

Current transfers. Transfers out of the income of the donor, reducing his saving and adding to that of the recipient.

Current transfers from corporations to persons. Charitable donations and other contributions.

Current transfers from government to business. Subsidies to the business sector.

Current transfers from government to non-residents. Pensions paid to non-residents, contributions to international organizations and economic and technical assistance as well as food aid provided by the Canadian International Development Assistance Agency and other governmental agencies.

Current transfers from government to persons. Payments such as the Child Tax Benefit/Credit, Employment Insurance benefits, old age security benefits, welfare payments, scholarships and research grants, workers' compensation benefits, grants to aboriginal peoples and

their organizations, public service pensions, pensions paid under the Canada and Quebec Pension Plans, and veterans' allowances.

Current transfers from non-residents to government. Withholding taxes paid by non-residents to the Government of Canada.

Current transfers from non-residents to persons. Pensions paid by foreign governments to Canadian residents plus remittances by non-residents to Canadian residents.

Current transfers from persons and unincorporated businesses to government. Income taxes, contributions to social insurance plans and other current transfers.

Current transfers from persons to corporations. The transfer portion of interest on the consumer debt.

Current transfers from persons to non-residents. Remittances by Canadian residents (particularly religious and charitable organizations) to non-residents and withholding taxes paid abroad.

Deflation. Process of eliminating price change from a specific time series.

Disposable income. See **personal disposable income**.

Dividends. Income payable and receivable in respect of corporate equities (cash dividends) and further equity participation in corporate enterprises (stock dividends).

Economic territory. The economic territory of a country encompasses the geographic territory, plus the air space, territorial waters and continental shelf, as well as its territorial enclaves abroad (embassies, consulates, military bases, etc.).

Existing assets. See **net acquisition of existing assets**.

Exports and imports of goods and services. Current receipts and payments arising out of transactions in moveable goods and services between residents and non-residents. Services include travel, freight and shipping, business services, government transactions, financial intermediation and other services.

Factor cost. A valuation reflecting the cost of production factors (labour and capital). It corresponds to the value remaining after the deduction from **market prices** of all applicable taxes and subsidies.

Farm inventories. Farm output stored on farms; includes grains, tobacco, potatoes and livestock.

Final domestic demand. The sum of personal expenditure on consumer goods and services, net government current expenditure on goods and services, government gross fixed capital formation and business gross fixed capital formation.

Fisher index. Geometric mean of the **Laspeyres index** and the **Paasche index**.

Fisher volume index. Geometric mean of the **Laspeyres volume index** and the **Paasche volume index**.

Fixed capital. See **gross fixed capital formation**.

Fixed-weighted price indexes. Also known as "Laspeyres" indexes, these are price indexes where a fixed pattern of expenditure from some base period is used to aggregate the detailed price indexes in each period.

Foreign investments. All marketable financial instruments (bonds, short-term paper and shares) which are liabilities of the non-resident sector (foreign governments and corporations) and assets of domestic sectors.

Government business enterprise profits before taxes. Net earnings from the economic activity of **government business enterprises**, measures after deduction of **capital consumption allowances**.

Government business enterprises. Government enterprises and agencies which operate on a profit or cost recovery basis and whose motivation is similar to that of private enterprises. Their total profits (net of losses) are recorded in GDP, while only the profits remitted to government are recorded in the government income and outlay account, under government investment income. The difference between these two measures, retained earnings, forms part of business sector saving.

Government current expenditure on goods and services. All current outlays for goods and services by the government sector, including wages and salaries of government employees. It also includes expenditure on weapons for defence and an imputation for the depreciation of government fixed assets. It is recorded before deduction of revenues from sales of goods and services in the government income and outlay account, and after deduction of these revenues in GDP (net government current expenditure on goods and services).

Government gross fixed capital formation. This expression covers all expenditures on buildings, engineering construction and machinery and equipment. Government gross fixed capital formation includes spending on non-military defence buildings and equipment (airports,

docks, roads, hospitals, transport aircraft, etc.). Abbreviated as **fixed capital** in the government capital and financial account.

Government investment in inventories. Government inventories include only uranium stocks, up to 1981, and those held by federal government commodity agencies, such as the Canadian Dairy Commission. Abbreviated as **inventories** in the government sector account.

Government investment income. In GDP, includes interest income of public service pension plans, other interest and dividend income of governments and royalties. In the government income and outlay account, it also includes the profits of government business enterprises remitted to government. See **government business enterprises**.

Government sales of goods and services. Revenues from the sale of goods and services, such as water charges, landing fees and charges for government documents.

Government sector. All departments, agencies, and funds (budgetary and non-budgetary) of the federal, provincial and local levels of government, as well as crown corporations which receive more than 50% of their revenues in grants from their parent governments. Also included are school boards, universities, non-profit colleges, hospitals, non-profit residential care facilities, as well as the Canada and Quebec Pension Plans.

Grain in commercial channels. Grain in the hands of the Canadian Wheat Board or private grain dealers.

Gross domestic product. The total unduplicated value of the goods and services produced in the economic territory of a country or region during a given period. GDP can be measured three ways: as total incomes earned in current production (income approach), as total final sales of current production (expenditure approach), or as total net values added in current production (value added approach). It can be valued either at base price or at market prices. In the Economic and Financial Accounts, Gross Domestic Product is measured by the income and expenditure approach.

Gross fixed capital formation. This expression covers all expenditures on buildings, engineering construction and machinery and equipment. Gross capital formation in machinery and equipment includes imports of used machinery and equipment since the latter constitute additions to domestic capital stock. Gross fixed capital formation in buildings includes transfer costs on the sale of existing fixed assets (e.g. real estate commissions). Abbreviated as **fixed capital** in the capital and financial account. Synonym of **investment in fixed capital**.

Gross fixed capital formation, corporations and government business enterprises sector. This expression covers all expenditures on buildings, engineering construction and machinery and equipment in the **corporations and government business enterprises sector**. It includes a large portion of the gross fixed capital formation in non-residential structures and machinery and equipment of the business sector. Abbreviated as **fixed capital** in the corporations and government business enterprises sector account.

Gross fixed capital formation, persons and unincorporated businesses sector. This expression covers all expenditures on buildings, engineering construction and machinery and equipment in the **persons and unincorporated businesses sector**. It includes mainly the gross fixed capital formation in residential structures but also includes a small portion of non-residential structures and machinery and equipment. Abbreviated as **fixed capital** in the persons and unincorporated businesses sector account.

Gross national product. A measure of income equal to the **Gross domestic product at market prices**, plus **investment income received from non-residents**, less **investment income paid to non-residents**.

Gross saving. Net saving plus capital consumption allowances.

Holding gains and losses. Additions to or subtractions from income which result from selling an asset for more or less than its purchase price. As holding gains and losses are not related to current production, they are excluded from GDP through the **inventory valuation adjustment**.

Households. A group of persons who share the same living accommodation, pool some, or all of their income and wealth and consume certain goods and services collectively. They may engage in any other kind of economic activity.

Implicit price indexes. These price indexes are a by-product of the **deflation** procedure, obtained by dividing an expenditure series expressed at current prices by the corresponding series expressed at constant prices. For all volume aggregates published in the Economic and Financial Accounts, the implicit price indexes are the chain Fisher price indexes.

Imports of goods and services. See **exports and imports of goods and services**.

Income and outlay account. This account shows, for each major sector, all sources of current income (production, receipts of property income and other transfers) and all

current outlays (expenditure on goods and services, payments of property income and other transfers), as well as **saving**, equal to a sector's income less its outlay.

Inheritances and migrants' funds. Capital brought to Canada by immigrants at the time of arrival or transferred outside Canada by emigrants at time of departure, or intended to be transferred at a later date, plus bequests to Canadian residents from non-residents or vice-versa.

Interest and miscellaneous investment income. Investment income of persons, except dividends, plus government investment income, less net investment income of persons and governments received from non-residents, less the transfer portion of interest on the consumer debt, less the interest on the public debt.

Interest, dividends and miscellaneous investment income of persons. Includes income of persons and unincorporated businesses as owners of financial or tangible non-produced assets in return for putting the assets at the disposal of another institutional unit. Interest includes interest on Canadian bonds, mortgage interest paid to persons and interest on deposits. Miscellaneous investment income includes accrued interest in pension plans, life insurance funds and interest on investments made by other "associations of individuals".

Interest on the consumer debt. Interest paid by persons on account of liabilities incurred to finance personal expenditure on consumer goods and services. Consists of two parts: the administrative expenses, representing the cost of rendering services to borrowers, and the remaining "transfer portion".

Interest on the public debt. Interest payments on liabilities of the government sector.

Inventories. See **investment in inventories**.

Statistical discrepancy. Double-entry bookkeeping is fundamental in national accounting and several aggregates, such as GDP and net lending, can be calculated in two or more ways. In principle, all the measures of an aggregate are equal. In practice, differences invariably arise between them due to imperfections in basic statistics and estimation techniques. This difference is called a statistical discrepancy and serves as the balancing item between two theoretically equal aggregates. It can be recorded as is, like the discrepancy between the two estimates of net lending or it can be divided in two, one half being subtracted from the higher estimate and the other, added to the lower one, like the discrepancy between income-based and expenditure-based GDP.

Examples of product subsidies are those paid for agricultural products, transportation services and energy.

They are primarily subsidies on wages and labour, pollution reduction subsidies and interest subsidies. Investment assistance is not included.

Supplementary labour income. Employers' social contributions, either compulsory or voluntary. Includes retirement allowances and contributions to employment insurance, the Canada and Quebec Pension Plans, other pension plans, workers' compensation, medicare, dental plans, short- and long-term disability insurance, etc.

It is recorded on a gross basis, before any deduction for income taxes, pensions, unemployment insurance and other social insurance schemes. Also includes other forms of compensation, namely commissions, tips, bonuses, directors' fees and allowances such as those for holidays and sick leave, as well as military pay and allowances. En théorie, toutes les mesures d'un agrégat sont égales. En pratique, des écarts surviennent inévitablement entre elles en raison d'imperfections dans les statistiques. Cet écart est appelé divergence statistique et sert de poste d'équilibre entre deux estimations théoriquement égales. Il peut être comptabilisé tel quel, comme la divergence entre les deux estimations du prêt net, ou il peut être divisé en deux, une moitié étant soustraite de l'estimation la plus élevée, et l'autre ajoutée à la plus basse, comme la divergence entre l'estimation du PIB en termes de revenus et celle en termes de dépenses.

Indice chaîne. Indice dont on change la période de base d'une période à l'autre et dont les estimations des variations sont cumulées multiplicativement à partir de la valeur obtenue pour la **période de référence**. Par exemple, dans le cas de l'**indice de volume en chaîne de Fisher**, on calcule l'indice de volume pour chaque paire de trimestres

consécutifs, en prenant le trimestre le moins récent comme période de base.

Indice de Fisher. Moyenne géométrique de l'**indice de Laspeyres** et de l'**indice de Paasche**.

Indice de Laspeyres. Indice calculé en utilisant comme poids les prix ou les volumes calculés pour une **période de base** prédéterminée.

Indice de Paasche. Indice calculé en utilisant comme poids les prix ou volumes calculés pour la période courante.

Indice de prix. Mesure de la variation des prix sous forme d'un indice. Il existe plusieurs méthodes de calcul des indices. Voir **Indice de Laspeyres**, **Indice de Paasche**, **Indice de Fisher**, **Indice chaîne** et **indices implicites de prix**.

Indices de prix à pondération fixe. Également appelés indices "Laspeyres", indices de prix dans lesquels un panier fixe de dépenses pour une période de référence donnée sert à agréger les indices de prix détaillés à chaque période.

Indice de prix en chaîne Fisher. Voir **indices implicites de prix**.

Indice de volume. Mesure de la croissance de laquelle est exclu l'effet de la variation des prix, présenté sous forme d'un indice. Il existe plusieurs méthodes de calcul des indices. Voir **indice de Laspeyres**, **indice de Paasche**, **indice de Fisher**, **indice chaîne**. Les Comptes économiques et financiers utilisent la méthode de l'**indice de volume en chaîne Fisher** pour calculer le PIB réel.

Indice de volume Fisher. Moyenne géométrique de l'**indice de volume Laspeyres** et l'**indice de volume Paasche**.

Indices de volume en chaîne Fisher. Une mesure de la variation en volume d'une période à l'autre. Elle est calculée comme la moyenne géométrique d'un **indice de volume en chaîne Paasche** et d'un **indice de volume en chaîne Laspeyres**. En d'autres termes, c'est la moyenne de deux mesures distinctes en volume: une calculée comme si les prix étaient constants dans la première des deux périodes adjacentes (volume de Laspeyres) et l'autre, comme si les prix étaient constants dans la seconde des deux périodes adjacentes (volume de Paasche).

Indices de volume en chaîne Laspeyres. Une mesure de la variation en volume d'une période à l'autre. Celle-ci est calculée comme si les prix étaient constants dans la première des deux périodes adjacentes. Les indices de chacune des périodes sont raccordés ensemble en une

chaîne pour former un indice. Les indices de volume en chaîne Laspeyres sont une des composantes des **indices de volume en chaîne Fisher** qui constituent la mesure officielle des Comptes économiques et financiers.

Indices de volume en chaîne Paasche. Une mesure de la variation en volume d'une période à l'autre. Celle-ci est calculée comme si les prix étaient constants dans la seconde des deux périodes adjacentes. Les indices de chacune des périodes sont raccordés ensemble en une chaîne pour former un indice. Les indices de volume en chaîne Paasche sont une des composantes des **indices de volume en chaîne Fisher** qui constituent la mesure officielle des Comptes économiques et financiers.

Indices implicites de prix. Ces indices sont un sous-produit de la procédure de **déflation** et sont obtenus en divisant une série des dépenses exprimées en prix courants par la série correspondante exprimée en prix constants. Dans le cas de tous les agrégats en volume publiés dans les Comptes économiques et financiers, les indices implicites de prix sont des indices de prix en chaîne Fisher.

Intérêts et revenus divers de placements.
